TELECOM CHURN ANALYSIS

Turning Churn Data into Actionable Business Insights

26th April, 2025

PROBLEM STATEMENT

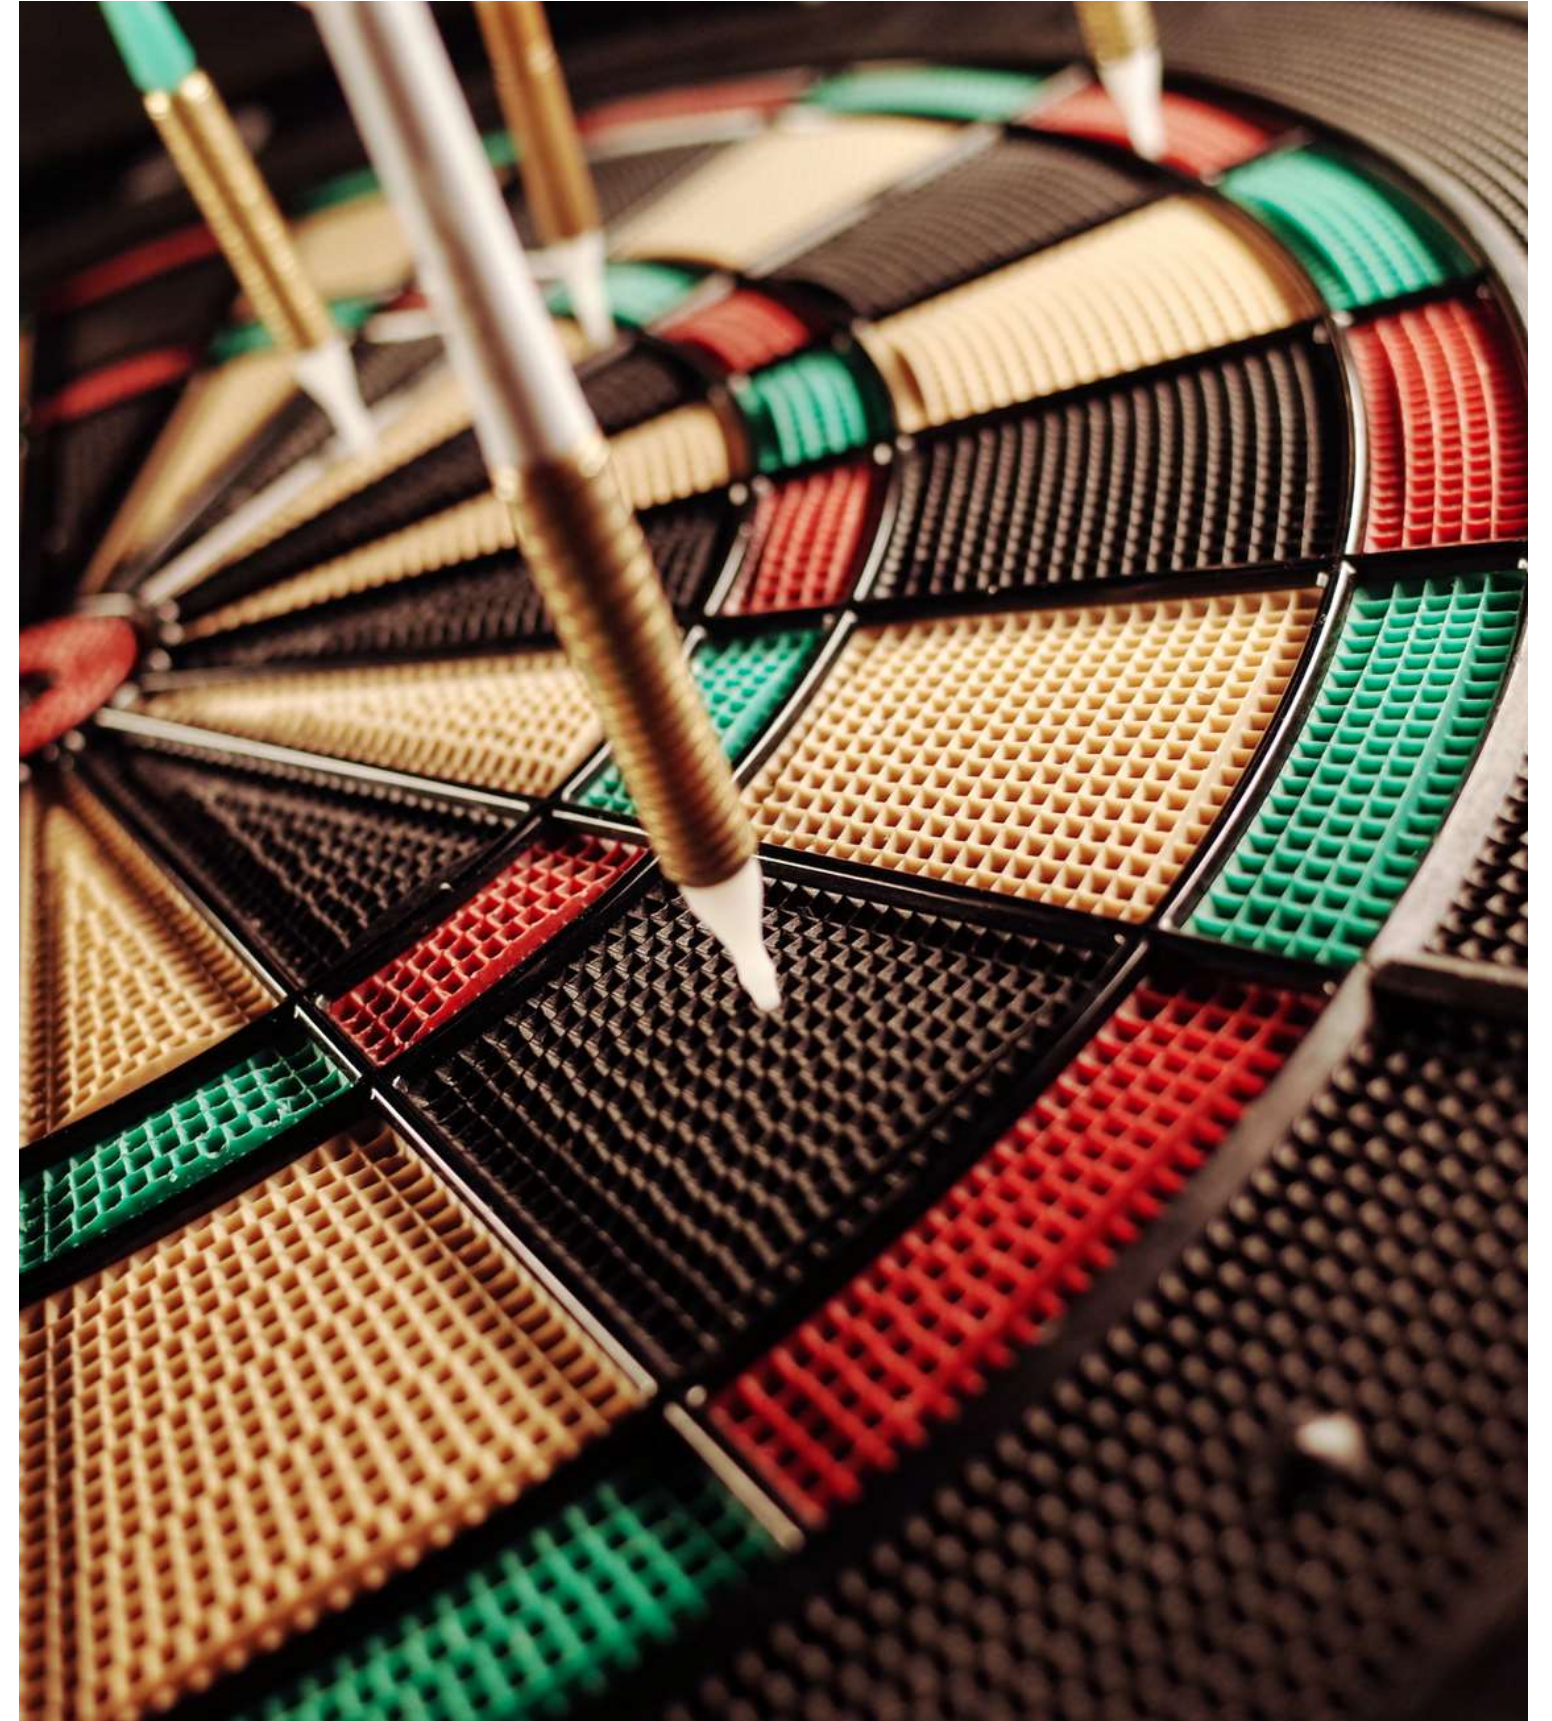

Customer churn remains a critical issue for Telecom companies, affecting revenue and customer lifetime value.

This analysis explores key drivers of churn to uncover actionable insights and guide retention strategies.

OBJECTIVES

- Analyze the overall churn rate and explore reasons for customer churn.
- Evaluate the impact of factors such as contracts, international plans, etc on churn behavior.
- Identify demographic and behavioral trends influencing churn.
- Assess the impact of customer service interactions on churn.
- Provide actionable insights to support churn reduction strategies.

DATA OVERVIEW

6687

**Total Number of
Customers**

4891

**Total Active
Customers**

26.86%

**Customer Churn
Rate**

Over a quarter of the customer base has churned. This requires urgent attention.

ANALYSIS INSIGHTS

KEY INSIGHTS

1. Top Churn Reasons :

- Most churns were due to competitor influence and dissatisfaction.

303

customers

Competitor Reason

297

customers

Network issues

203

customers

**Customer Service
Support**

KEY INSIGHTS

2. International Plan and Activeness:

71.19% churn

**Intl Active Customers = yes, but
no Intl Plan**

7.59% churn

**Intl Plan + Active:
Only**

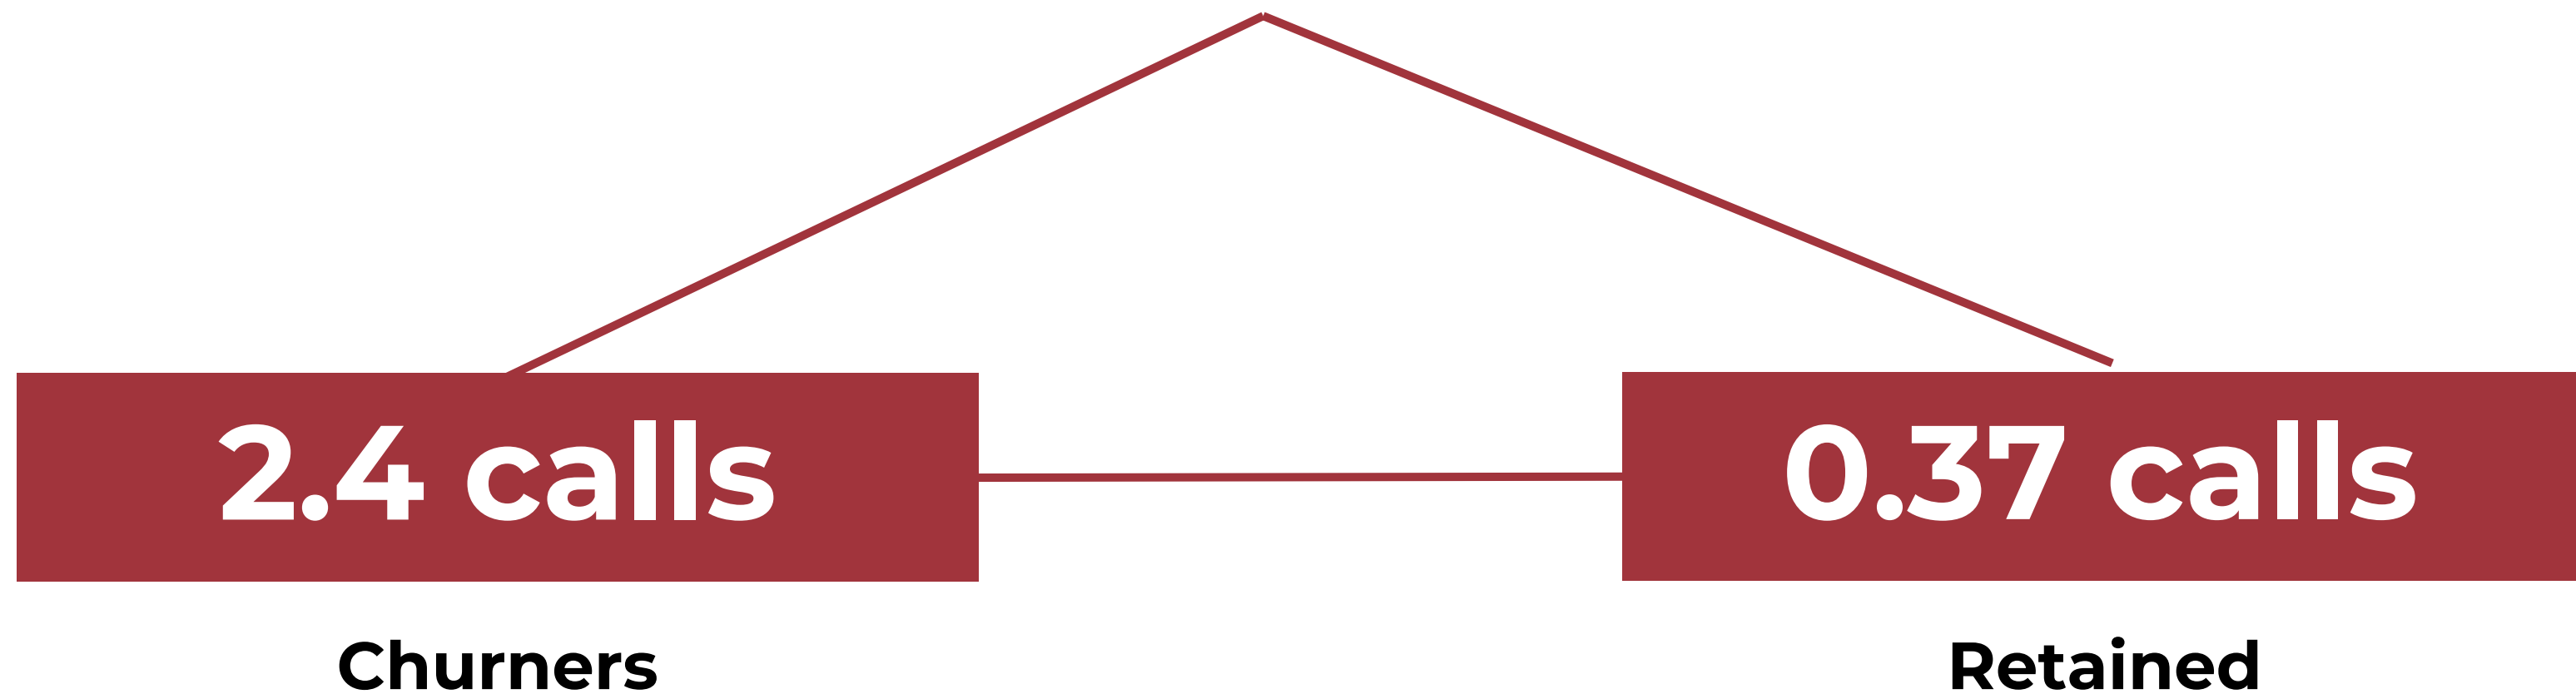

Those who frequently use international services are retained if subscribed to an international plan.

KEY INSIGHTS

3. Customer Support Calls

Average Calls Made by Customers

KEY INSIGHTS

4. Demographic Insights

- Majority of churned customers are under 30 (youth).

33.02%

Female

32.26%

Male

34.72%

Prefer not to say

KEY INSIGHTS

4. Churn by Account Length

- Customers with shorter account durations are more likely to churn.

Peaks at
62%

Steadily declines after 10 months

7.7%

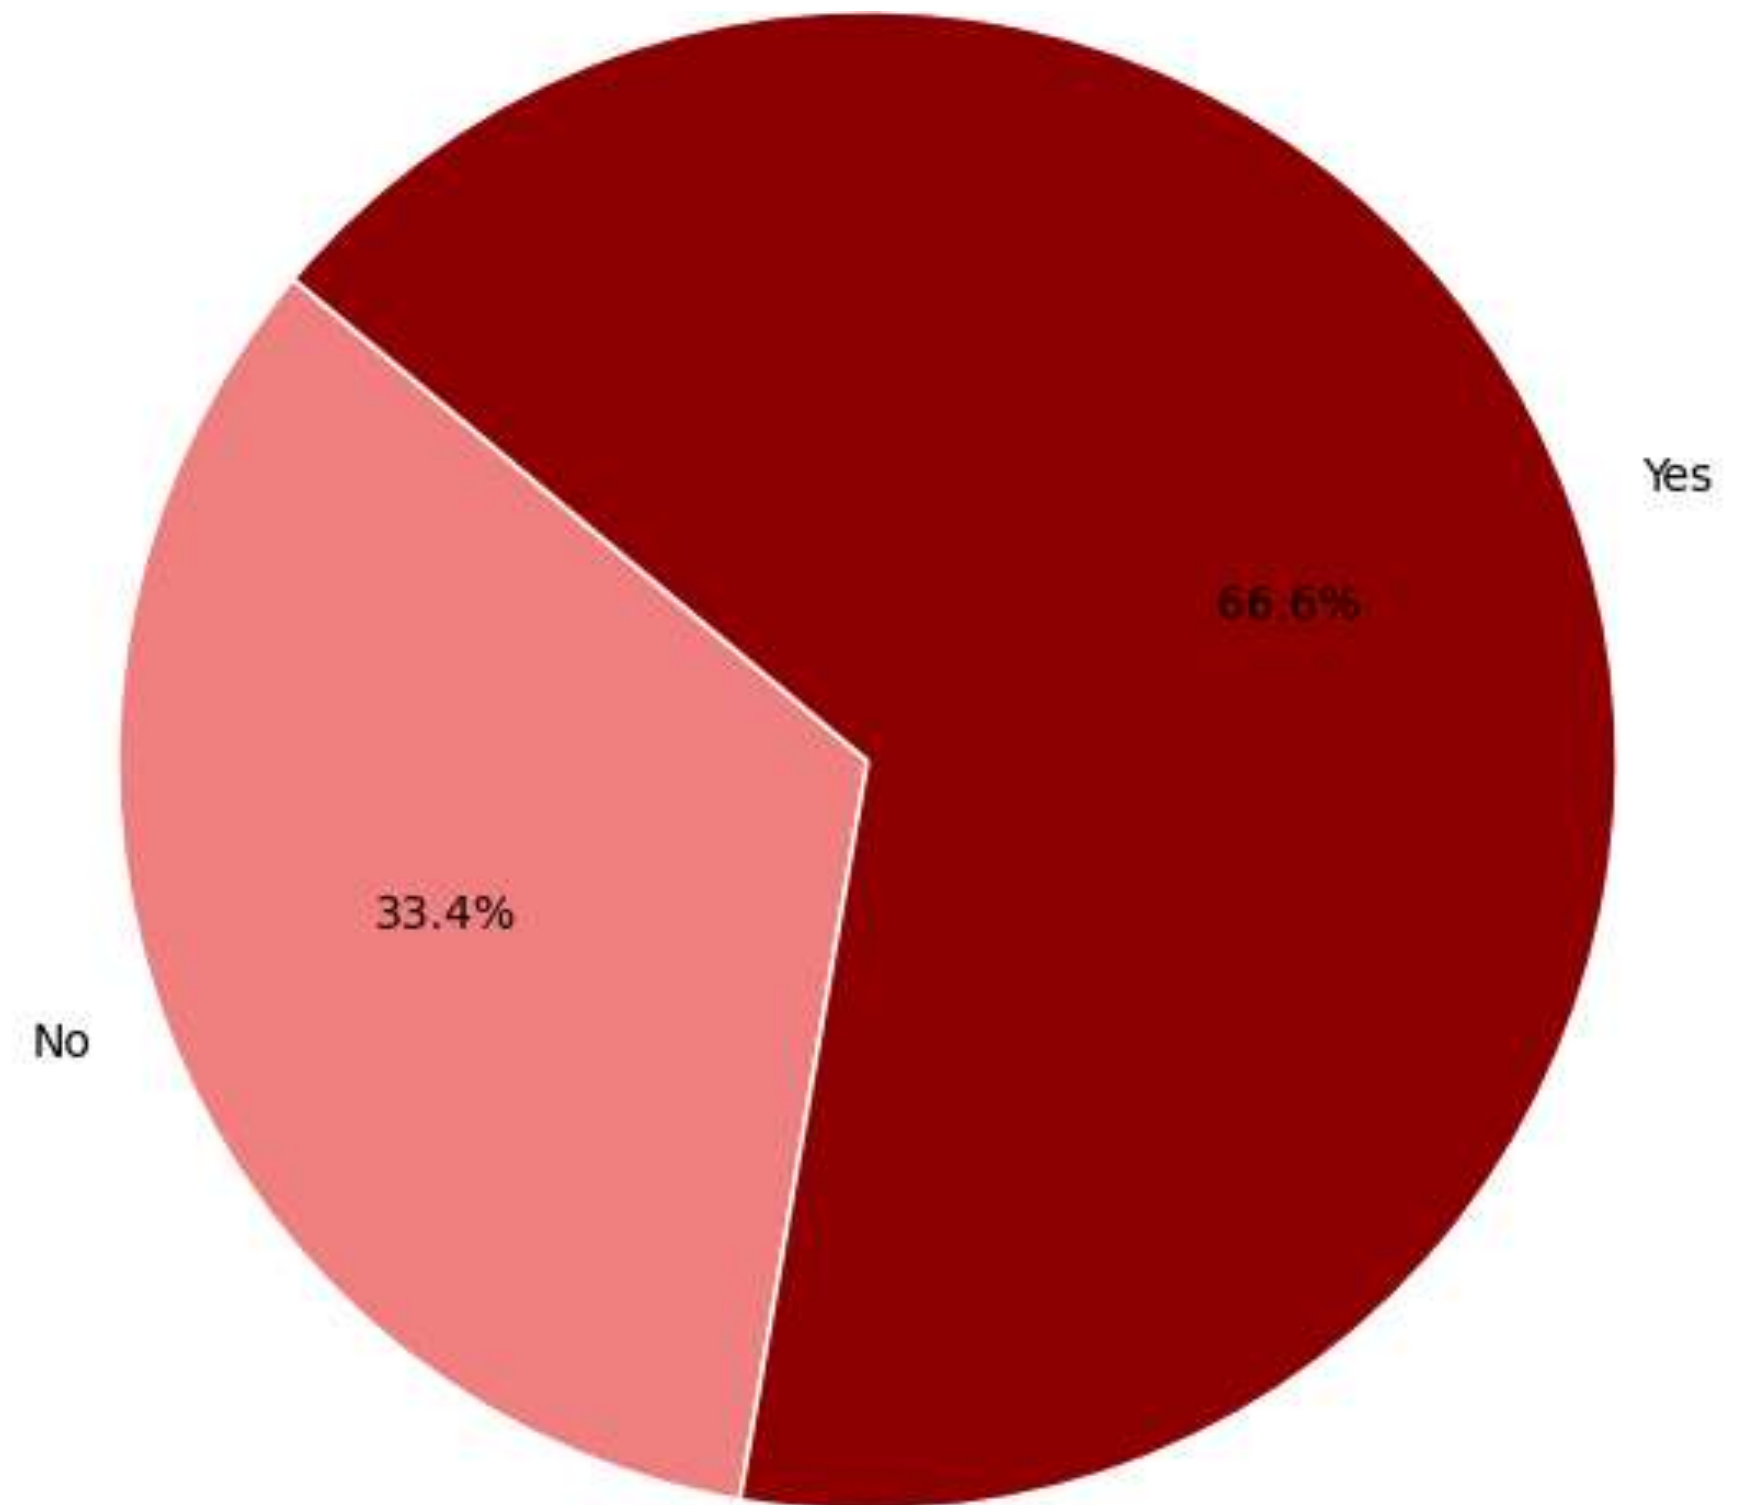

Churn rate in first 5 months

Churn rate after 50 months

KEY INSIGHTS

5. Unlimited Data Plan

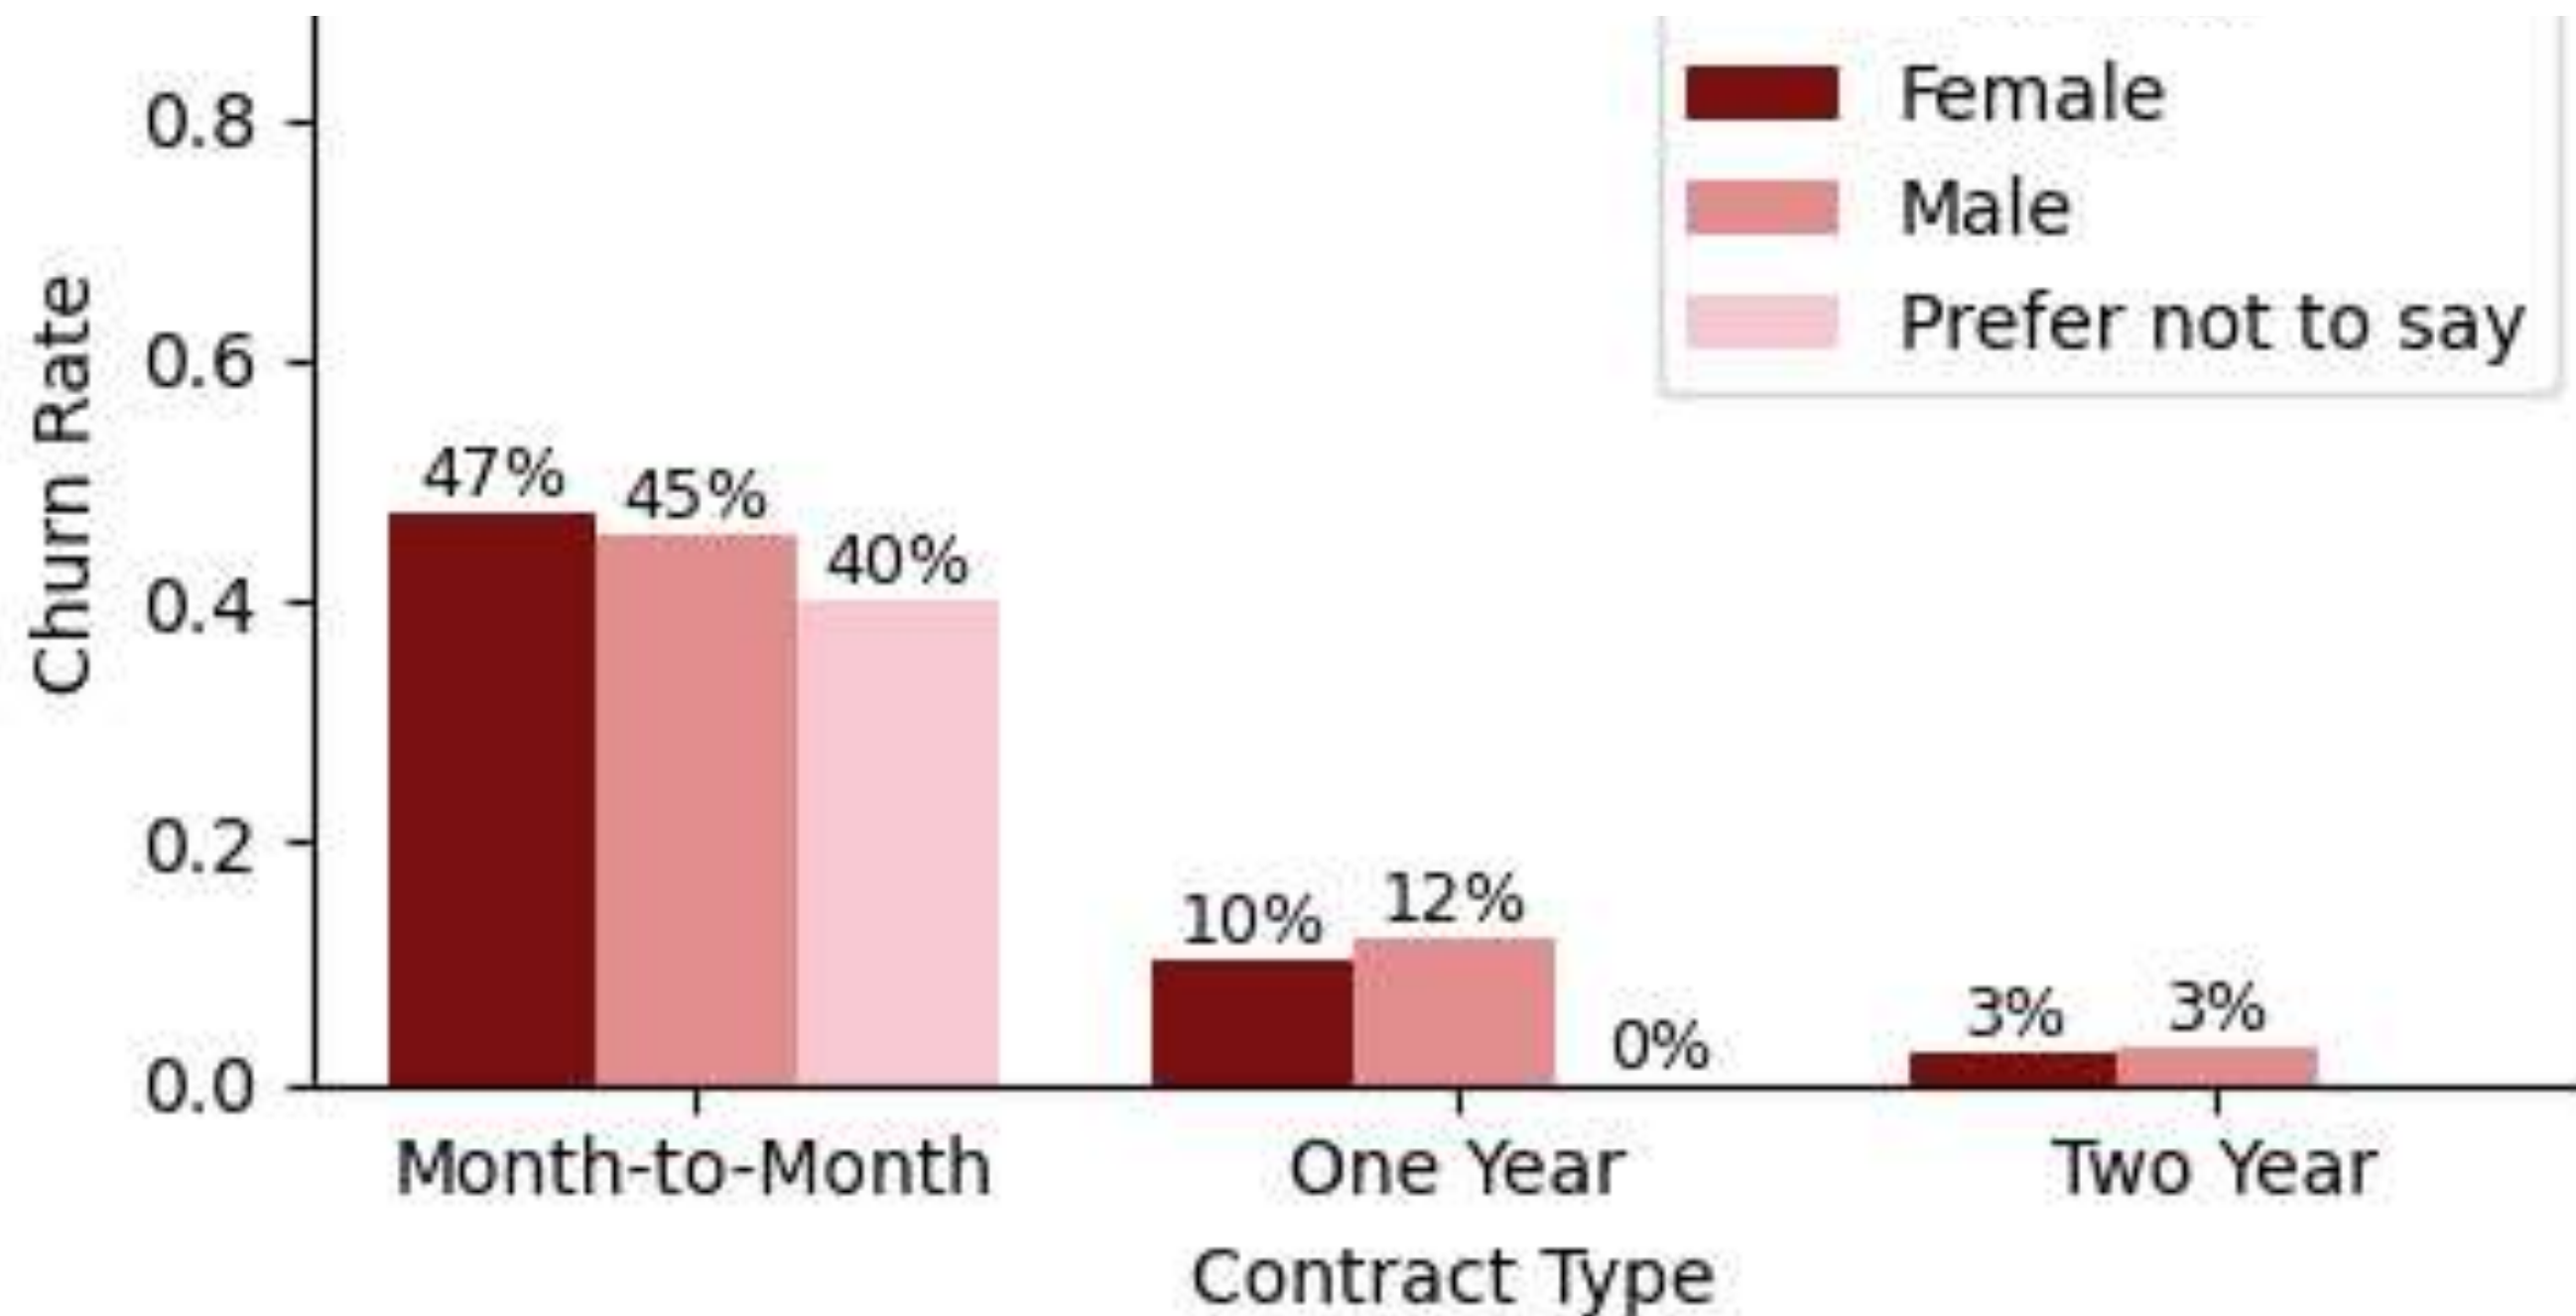

- Customers with unlimited plans churn more.

KEY INSIGHTS

6. Contract Type & Gender Impact

- Churn is low among customers with long-term contracts, especially among females

KEY INSIGHTS

7. Group Affiliation & Age

- Customers aged 50+ without group affiliation churn more than those in a group

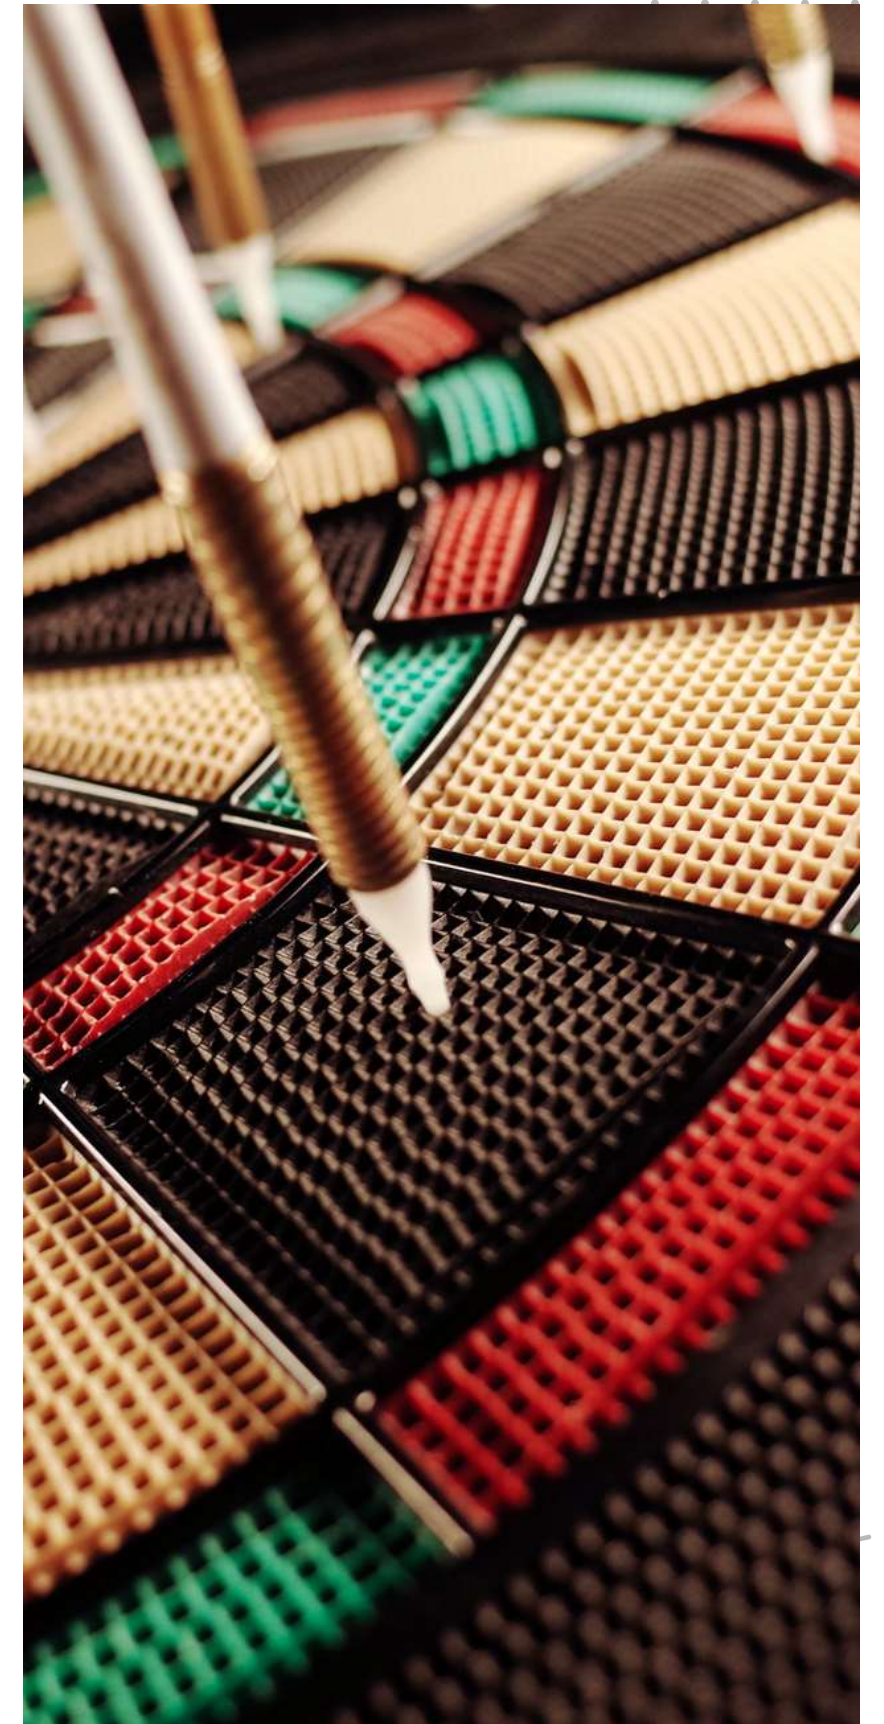

36.39%

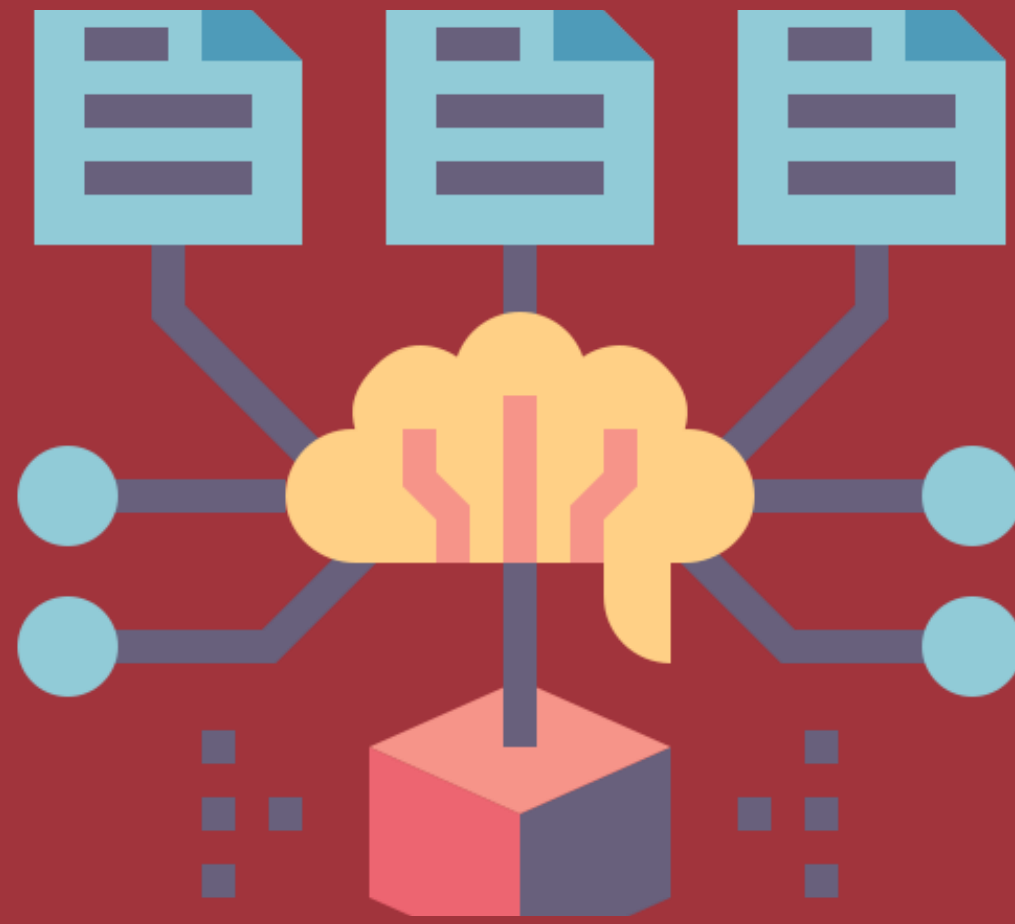

- Customers in group contracts churn less.

RECOMMENDATIONS

- Improve service quality and offer competitive pricing to address key churn reasons.
- Encourage group contracts and optimize international offerings for high-risk users.
- Use demographic and usage data to create targeted retention campaigns.
- Train agents and monitor frequent callers to reduce churn triggered by poor service.
- Use churn prediction models to engage and retain high-risk customers proactively.

**LET'S PREDICT
WHICH
CUSTOMERS
MIGHT LEAVE**

CONCLUSION

- Churn rate stands at 26.86%, with most customers leaving voluntarily.
- Over 70% of internationally active users without a plan churned.
- Churned customers made 2.4 service calls on average vs. 0.37 for non-churners.
- Group affiliation and long-term contracts reduce churn significantly.
- Younger, high-data users are more prone to churn without targeted support.

The background of the slide features a stylized illustration. In the center, a hand is shown placing a red bar onto a bar chart. The chart has two other bars, one red and one white. Surrounding the chart are several stylized figures of people running or jumping, suggesting a sense of urgency or achievement. There are also yellow lightning bolts scattered around the scene. The entire illustration is set against a dark red background. The text 'THANK YOU' is centered over the illustration in a large, white, sans-serif font. A thin white horizontal line is positioned directly below the text.

THANK YOU
